

**ULTIMATE ADVANCEMENT
IN MICRONEEDLING
FOR UNPARALLELED RESULTS**

Dermapenworld : ORIGINAL TRUSTED AUSTRALIAN

STAYING AHEAD OF THE COMPETITION WITH Dp4™

With the introduction of DermapenWorld's predecessor in 2010, Microneedling was revolutionised with the first automated technology. The launch of Dp4 sets a new standard and benchmark that delivers industry and procedural transformation.

Why you'll want to join the Revolution

Over the past few years, millions of dollars have been allocated for research, development and modification that will reinvent microneedling as we know it.

Nothing like this has ever been attempted before, the challenges of developing a device that could reliably control all functionality with the touch of a button were immense. Stene Marshall, the creator of Dp4, is an Australian engineerical innovator who has inspired and led a team of highly skilled hardware and software engineers to revolutionise the future of needling - The Dp4.

Over 10,398 man hours were invested perfecting these systems, in order to deliver this masterfully crafted, sleek, simple and easy to use piece of medical equipment, which adheres to the highest possible design and production standards available in the world today.

DermapenWorld caters to serious practitioners who desire to stay ahead of their competition. Dp4 delivers the ultimate in advanced and innovative microneedling with unsurpassed confidence, service and outstanding patient results.

But is it the right choice for you? We invite you to be the judge, so please join us in evaluating the reasons why you should upgrade to Dp4.
