

The *Ideal* skin lifting and tightening solution

**2-in-1 HIFU and RF
Microneedling System**

prolift dual™

Secure new revenue streams with the ultimate lifting and tightening dual

The 2-in-1 PROLIFT DUAL system offers a unique combination of Radio Frequency Microneedling (RFM) and High Intensity Focused Ultrasound (HIFU), clinically proven to address in-demand patient treatments such as non-surgical face lifting, tightening, scar reduction and overall skin rejuvenation.

Elevate your patient's treatment experience with next generation technologies designed for improved effectiveness, reduced downtime, and enhanced comfort. Keep your patients coming back for more with comprehensive treatment plans addressing multiple layers of the skin to restore the skin's youthful appearance.

BENEFITS TO YOUR BUSINESS

2 handpieces, multiple treatment offerings

Long lasting and reasonably priced consumables to improve your bottom line

Safe, with minimal discomfort and downtime

User friendly interface & pre-sets

Advantages

Advanced technology for the *ultimate* treatment experience

prolift rfm™

Advanced vacuum technology
for even and accurate treatments

2Mhz delivery
for improved comfort

Non-insulated needles
for optimized results

prolift hifu™

Long lasting transducers
20,000 shots per transducer

Transhole Macro Transducer(TMT)
for improved comfort

3 focused depths
*1.5mm, 3.0mm and 4.5 mm for
treatment versatility*

RF Microneedling Handpiece

Radio Frequency Microneedling (RFM) is a popular treatment that can safely and effectively address a range of face and body concerns. This innovative handpiece combines the benefits of microneedling with radio frequency, taking skin rejuvenation to the next level.

Non-insulated needles for optimized results

- Fractional radio frequency energy is delivered through the entire length of the needle for uniform and consistent energy delivery.
- Tips are available in 25 and 10 pin options.
- Maximum needle depth is 3.5mm.

Needling

RF energy generation

Advanced vacuum technology & 2Mhz delivery for improved comfort

- The latest move from 1 to 2Mhz allows for the most comfortable RF microneedling treatment on the market.
- The unique vacuum feature gently pulls the tissue into the tip resulting in even and accurate treatment depth, increased safety, and improved comfort for the patient.
- Vacuum is a major benefit when treating sensitive areas around the eye and T-zone.

Handpiece contact

Vacuum technology

Sophisticated motor for smooth & fast performance

PROLIFT RFM 25pin needle

- Smooth and fast insertion of needles is maintained using unique motor mounting control technology.
- Patients will experience a delicate procedure without severe recoil when needles are inserted into the skin.

How PROLIFT RFM works

The PROLIFT RFM handpiece uses a combination of vacuum technology and fractional Radio Frequency Microneedling (RFM) for precise delivery of thermal energy into the skin. The thermal energy in combination with the slight injury caused by the needles, stimulates the production of collagen and elastin to regenerate the skin and improve tone and texture. Common treatment benefits include: Increased skin elasticity, fine line and wrinkle reduction, improved skin texture, a reduction in scarring and stretch marks.

- Tissue stimulus through needling
- RF irradiation to desired depth

- Wound healing
- Collagen regeneration

- Wound healing regeneration period - about 3 weeks
- Collagen elastin synthesis

- Collagen remodeling

High Intensity Focused Ultrasound (HIFU) Handpiece

As the trend for non-surgical procedures continues to grow, HIFU has become a popular choice for skin tightening and lifting. The PROLIFT HIFU handpiece offers multiple cartridges to target different skin layers for treatment customization and boosted effectiveness. With no downtime, patients can get on with their daily activities right after treatment.

3 focused depths for treatment versatility

- **1.5mm** Effectively targets superficial dermis where loosely arranged collagen fiber resides.
- **3.0mm** Targets the dermis which is made up of fibroblasts where the thermal effect creates the most tightening efficacy.
- **4.5mm** Targets the SMAS where most of the lifting efficacy of HIFU takes place.

1.5 mm

3.0 mm

4.5 mm

Transhole Macro Transducer Technology (TMT)

20,000 shots
per Transducer

Get more shots out of your transducer

PROLIFT HIFU delivers 20,000 shots per transducer. Save more per shot and boost your return on investment.

Advanced TMT technology offers an effective and more comfortable treatment experience for your patients. By diverting energy away from the surface of the skin, the energy is focused to deep dermal layers to deliver optimized tightening results in a more comfortable manner.

- Decreases skin damage and side effects
- Generates stable ultrasound energy transfer and coagulation points.
- Reduces pain for patient for a more comfortable treatment experience.

Comfortable and ergonomic handpiece for operator convenience

- Multiple treatment buttons for operator convenience.
- Easily interchange HIFU cartridges based on treatment needs.
- Lightweight handpiece design for operator comfort.

How PROLIFT HIFU works

Focused high-intensity ultrasound energy generates 65°C of heat which is delivered to an accurate depth of the skin layer. Heat damages targeted skin cells, causing the body to repair which in turn produces collagen to aid in cell regrowth. HIFU works at a deep level in the skin and therefore, no damage to the skin surface occurs. This safe and effective procedure provides a non-surgical, non-invasive way to increase elasticity.

Popular HIFU treatments

Neck tightening

Jowl reduction

Eyelid and eyebrow
lifting

Wrinkle reduction

Chest skin tightening
& smoothing

Aesthetic technologies designed to *enrich and enhance*

LUVVO™ provides powerful solutions, utilizing IPL, laser, RF, HIFU, cryo, microdermabrasion, microneedling, PRP and more designed to provide safe, effective & consistent treatment outcomes.

Expand treatment options and maximize return on investment with products designed to treat and enhance.

ABOUT LUVVO

Our team of professionals at LUVVO is passionate about providing proven, gold-standard technologies to physicians and their patients. We aim to empower patients to elevate their self-care by demystifying aesthetic treatments.

We provide transparency in our service and support, so our partners can feel confident in their decisions and focus on what matters most: Their patients. LUVVO is ready to change mindsets, one treatment at a time.

Together, we are challenging the status quo and redefining self-care.

PROLIFT DUAL TECHNICAL SPECS

Item	Specification		
System Input Power and Power Consumption	AC 110 ~ 240 V, 50 /60 Hz, 170VA		
Focused Ultrasound	SD7-1.5	DD7 3.0	SM4 4.5
Frequency (MHz)	7	7	4
Focal length/depth (mm)	1.5	3.0	4.5
Output power (Energy)(J)	0.10~0.25	0.20~0.45	0.60~1.20
Treatment spacing (Pitch)(mm)	1.1~1.4	1.1~1.4	1.5~1.9
Treatment length (mm)	24	24	24
RF Multi Needle			
Output frequency (MHz)	2		
Operation type	Bipolar		
Needle depth	0.5~3.5mm		
Needle exposure time	100 ~ 300ms		
Vacuum (mmHg ±20%)	Level 0	0-673	

Item		Specification	
		Dimensions & Weight
