ABOUT VISION MEDICAL, INC.

Our mission is to advance the art and science of hair restoration through technology and research. We have over 100 years of combined experience in bringing innovative technology to the medical market. We put our industry knowledge, expertise and customer understanding to work for you.

Because of our financial stability, we offer the most innovative high tech products, outstanding customer service, and an ever-expanding worldwide distribution network. And because we manufacture the SmartGraft device ourselves, we are able to be more responsive to the market.

Using feedback from our users, we have the expertise, the know-how, and the resources to quickly turn new ideas into effective products that meet a variety of needs and price points. We are even stronger at anticipating future market trends to help support our customers and their patients.

With more breakthrough technologies currently in the pipeline, we are ideally positioned to increase our global presence and continue to help you grow your practice.

Vision Medical, Inc. is based just outside of Philadelphia, PA. We manufacture the SmartGraft device in the U.S.A.

## THE FUTURE OF HAIR RESTORATION IS HERE...NOW!

Developed by physicians, medical scientists and engineers, SmartGraft uses the most innovative technology in advanced hair restoration for both men and women, SmartHarvest Technology. This allows the operator to harvest grafts more efficiently, safely, and quickly, while keeping grafts moist, chilled, and robust prior to implantation. It also allows the physician to harvest grafts from other parts of the body, such as chest and face, for better results, and it incorporates the most critical component of hair transplantation -- the human artistry required for proper facial framing.

SmartGraft provides physicians and patients with a more efficient, safe technique compared with conventional hair transplant methods.

- Minimally invasive office procedure
- No scalpel incision
- More natural looking with no linear scar
- Virtually no discomfort
- Patients return to normal physical activities in few days
- Reduced treatment times
- Permanent results

LIGHTWEIGHT FOR EASE OF USE. ILLUMINATES THE SURGICAL SITE.

HIGH TECH, COMPUTERIZED! PREPROGRAMED SETTINGS.

MOIST, COOL, STERILE ENVIRONMENT FOR OPTIMAL GRAFT PRESERVATION.
